On February 15th Deputies responded to State Route B in Rockville to take a report of a vehicle theft. When the victim let her dogs outside that morning she noticed that her truck was not in her driveway where she had parked it the night before. They had OnStar in the vehicle. OnStar was able to look at the vehicle's GPS and they advised Dispatch that the vehicle was located just a few miles northwest of the residence. Deputies responded to the location of the vehicle. The back glass was broken out of the truck. A Detective arrived on the scene to process the vehicle. The items collected from the truck will be sent to the lab for analysis.
